INFORMATION OF PRODUCT

Specifications:

100% natural stone surface, Harder and stronger than slate tiles by reinforcing with polyester resin, Thickness 2-3 mm, weight ca. 2.20/m².

Cutting tools to work with :

Veneer can be worked with any commercially available tools available in all DIY stores. It can be cut by any file cutting blades.

- Cutting with hard-metal tipped circular saw, skill saw (diamond blade, stone saw).
- Drilling and routing: Use tools for wood or stone.
- Flexibility can be increased by applying heat (using heat-gun around 400°C).

Lamination on wood, metals, plasterboard, fiber cement, XPS sheet:

When laminating (bonding) Veneer onto wood, fiber cement, plasterboard and metal, as well as most furniture applications, we recommend a 1 component P (polyurethane) adhesive.

Adhesive :

- PU-Adhesive, MS-Polymer, Epoxy, Silicone.

Sealing and Protection :

We suggest any good stone impregnation and sealer application.

- wall : any good stone sealer.
- Wet areas / wall: Any good two component PU sealer.
